⋮ APPLICATION PERMISSIONS

| PERMISSION | STATUS | INFO | DESCRIPTION |
|---|-----------|---------------------------------------|--|
| android.permission.ACCESS_FINE_LOCATION | dangerous | fine (GPS) location | Access fine location sources, such as the Global Positioning System on the phone, where available. Malicious applications can use this to determine where you are and may consume additional battery power. |
| android.permission.ACCESS_COARSE_LOCATION | dangerous | coarse (network-based) location | Access coarse location sources, such as the mobile network database, to determine an approximate phone location, where available. Malicious applications can use this to determine approximately where you are. |
| android.permission.READ_CONTACTS | dangerous | read contact data | Allows an application to read all of the contact (address) data stored on your phone. Malicious applications can use this to send your data to other people. |
| android.permission.READ_PROFILE | dangerous | read the user's personal profile data | Allows an application to read the user's personal profile data. |
| android.permission.READ_PHONE_STATE | dangerous | read phone state and identity | Allows the application to access the phone features of the device. An application with this permission can determine the phone number and serial number of this phone, whether a call is active, the number that call is connected to and so on. |
| android.permission.SUBSCRIBED_FEEDS_READ | normal | read subscribed feeds | Allows an application to receive details about the currently synced feeds. |
| android.permission.SUBSCRIBED_FEEDS_WRITE | dangerous | write subscribed feeds | Allows an application to modify your currently synced feeds. This could allow a malicious application to change your synced feeds. |
| android.permission.WRITE_SYNC_SETTINGS | normal | write sync settings | Allows an application to modify the sync settings, such as whether sync is enabled for Contacts. |

| PERMISSION | STATUS | INFO | DESCRIPTION |
|--|-----------|--|--|
| android.permission.READ_SYNC_SETTINGS | normal | read sync settings | Allows an application to read the sync settings, such as whether sync is enabled for Contacts. |
| android.permission.MANAGE_ACCOUNTS | dangerous | manage the accounts list | Allows an application to perform operations like adding and removing accounts and deleting their password. |
| android.permission.USE_CREDENTIALS | dangerous | use the authentication credentials of an account | Allows an application to request authentication tokens. |
| android.permission.DOWNLOAD_WITHOUT_NOTIFICATION | unknown | Unknown permission | Unknown permission from android reference |
| android.permission.GET_ACCOUNTS | dangerous | list accounts | Allows access to the list of accounts in the Accounts Service. |
| android.permission.FOREGROUND_SERVICE | normal | enables regular apps to use Service.startForeground. | Allows a regular application to use Service.startForeground. |
| com.google.android.c2dm.permission.RECEIVE | normal | recieve push notifications | Allows an application to receive push notifications from cloud. |
| android.permission.NFC | normal | control Near-Field Communication | Allows an application to communicate with Near-Field Communication (NFC) tags, cards and readers. |
| android.permission.INTERNET | normal | full Internet access | Allows an application to create network sockets. |
| android.permission.VIBRATE | normal | control vibrator | Allows the application to control the vibrator. |
| android.permission.GET_PACKAGE_SIZE | normal | measure application storage space | Allows an application to find out the space used by any package. |
| android.permission.BLUETOOTH | normal | create Bluetooth connections | Allows applications to connect to paired bluetooth devices. |
| android.permission.WRITE_EXTERNAL_STORAGE | dangerous | read/modify/delete external storage contents | Allows an application to write to external storage. |
| android.permission.SET_WALLPAPER | normal | set wallpaper | Allows the application to set the system wallpaper. |
| com.google.android.providers.gsf.permission.READ_GSERVICES | unknown | Unknown permission | Unknown permission from android reference |
| android.permission.SYSTEM_ALERT_WINDOW | dangerous | display system-level alerts | Allows an application to show system-alert windows. Malicious applications can take over the entire screen of the phone. |
| android.permission.WAKE_LOCK | normal | prevent phone from sleeping | Allows an application to prevent the phone from going to sleep. |
| android.permission.ACCESS_NETWORK_STATE | normal | view network status | Allows an application to view the status of all networks. |

| PERMISSION | STATUS | INFO | DESCRIPTION |
|---|-----------|--|---|
| android.permission.RECEIVE_BOOT_COMPLETED | normal | automatically start at boot | Allows an application to start itself as soon as the system has finished booting. This can make it take longer to start the phone and allow the application to slow down the overall phone by always running. |
| android.permission.CHANGE_WIFI_STATE | normal | change Wi-Fi status | Allows an application to connect to and disconnect from Wi-Fi access points and to make changes to configured Wi-Fi networks. |
| android.permission.CHANGE_NETWORK_STATE | normal | change network connectivity | Allows applications to change network connectivity state. |
| android.permission.WRITE_SETTINGS | dangerous | modify global system settings | Allows an application to modify the system's settings data. Malicious applications can corrupt your system's configuration. |
| com.android.vending.BILLING | normal | application has in-app purchases | Allows an application to make in-app purchases from Google Play. |
| android.permission.USE_BIOMETRIC | normal | allows use of device-supported biometric modalities. | Allows an app to use device supported biometric modalities. |
| android.permission.ACCESS_MEDIA_LOCATION | dangerous | access any geographic locations | Allows an application to access any geographic locations persisted in the user's shared collection. |
| android.permission.REQUEST_IGNORE_BATTERY_OPTIMIZATIONS | normal | permission for using Settings.ACTION_REQUEST_IGNORE_BATTERY_OPTIMIZATIONS. | Permission an application must hold in order to use Settings.ACTION_REQUEST_IGNORE_BATTERY_OPTIMIZATIONS. |
| android.permission.WRITE_MEDIA_STORAGE | unknown | Unknown permission | Unknown permission from android reference |
| com.android.launcher.permission.INSTALL_SHORTCUT | unknown | Unknown permission | Unknown permission from android reference |

△ NETWORK SECURITY

| Ī | NO | SCOPE | SEVERITY | DESCRIPTION |
|---|----|-------|----------|-------------|
| | | | | |

CERTIFICATE ANALYSIS

HIGH: 1 | WARNING: 1 | INFO: 1

| TITLE | SEVERITY | DESCRIPTION |
|--|----------|---|
| Signed Application | info | Application is signed with a code signing certificate |
| Application vulnerable to Janus Vulnerability | warning | Application is signed with v1 signature scheme, making it vulnerable to Janus vulnerability on Android 5.0-8.0, if signed only with v1 signature scheme. Applications running on Android 5.0-7.0 signed with v1, and v2/v3 scheme is also vulnerable. |
| Certificate algorithm vulnerable to hash collision | high | Application is signed with MD5. MD5 hash algorithm is known to have collision issues. |

Q MANIFEST ANALYSIS

| NO | ISSUE | SEVERITY | DESCRIPTION |
|----|--|----------|--|
| 1 | App can be installed on a vulnerable upatched Android version Android 5.0-5.0.2, [minSdk=21] | high | This application can be installed on an older version of android that has multiple unfixed vulnerabilities. These devices won't receive reasonable security updates from Google. Support an Android version => 10, API 29 to receive reasonable security updates. |
| 2 | Clear text traffic is Enabled For App [android:usesCleartextTraffic=true] | high | The app intends to use cleartext network traffic, such as cleartext HTTP, FTP stacks, DownloadManager, and MediaPlayer. The default value for apps that target API level 27 or lower is "true". Apps that target API level 28 or higher default to "false". The key reason for avoiding cleartext traffic is the lack of confidentiality, authenticity, and protections against tampering; a network attacker can eavesdrop on transmitted data and also modify it without being detected. |
| 3 | Application Data can be Backed up [android:allowBackup=true] | warning | This flag allows anyone to backup your application data via adb. It allows users who have enabled USB debugging to copy application data off of the device. |
| 4 | Broadcast Receiver (com.google.android.apps.photos.account.full.RefreshAccountsReceiver) is not Protected. [android:exported=true] | warning | A Broadcast Receiver is found to be shared with other apps on the device therefore leaving it accessible to any other application on the device. |
| 5 | Broadcast Receiver (com.google.android.apps.photos.actionqueue.impl.SystemReceiver) is not Protected. [android:exported=true] | warning | A Broadcast Receiver is found to be shared with other apps on the device therefore leaving it accessible to any other application on the device. |
| 6 | Broadcast Receiver (com.google.android.apps.photos.analytics.install.InstallReceiver) is not Protected. [android:exported=true] | warning | A Broadcast Receiver is found to be shared with other apps on the device therefore leaving it accessible to any other application on the device. |
| 7 | Activity-Alias (com.google.android.apps.photos.autoadd.api.LiveAlbumCreationActivityAlias) is not Protected. [android:exported=true] | warning | An Activity-Alias is found to be shared with other apps on the device therefore leaving it accessible to any other application on the device. |
| 8 | Activity (com.google.android.apps.photos.autobackup.datatransparency.DataTransparencyActivity) is not Protected. [android:exported=true] | warning | An Activity is found to be shared with other apps on the device therefore leaving it accessible to any other application on the device. |
| 9 | Service (com.google.android.apps.photos.backup.apiservice.PhotosBackupApiService) is not Protected. [android:exported=true] | warning | A Service is found to be shared with other apps on the device therefore leaving it accessible to any other application on the device. |
| 10 | Service (com.google.android.apps.photos.backup.apiservice.PhotosCustomBackupApiService) is not Protected. [android:exported=true] | warning | A Service is found to be shared with other apps on the device therefore leaving it accessible to any other application on the device. |

| NO | ISSUE | SEVERITY | DESCRIPTION |
|----|---|----------|---|
| 11 | Service (com.google.android.apps.photos.backup.apiservice.extensions.BackupExtensionsApiService) is not Protected. [android:exported=true] | warning | A Service is found to be shared with other apps on the device therefore leaving it accessible to any other application on the device. |
| 12 | Service (com.google.android.apps.photos.cameraassistant.CameraAssistantService) is not Protected. [android:exported=true] | warning | A Service is found to be shared with other apps on the device therefore leaving it accessible to any other application on the device. |
| 13 | Activity (com.google.android.apps.photos.cloudstorage.ui.backupoptions.BackupOptionsActivity) is not Protected. [android:exported=true] | warning | An Activity is found to be shared with other apps on the device therefore leaving it accessible to any other application on the device. |
| 14 | Activity (com.google.android.apps.photos.create.movie.deeplink.ConceptMovieDeepLinkActivity) is not Protected. [android:exported=true] | warning | An Activity is found to be shared with other apps on the device therefore leaving it accessible to any other application on the device. |
| 15 | Activity-Alias (com.google.android.apps.photos.create.movie.deeplink.ConceptMovieDeepLinkActivityAlias) is not Protected. [android:exported=true] | warning | An Activity-Alias is found to be shared with other apps on the device therefore leaving it accessible to any other application on the device. |
| 16 | Service (com.google.android.apps.photos.daydream.PhotosDreamService) is Protected by a permission, but the protection level of the permission should be checked. Permission: android.permission.BIND_DREAM_SERVICE [android:exported=true] | warning | A Service is found to be shared with other apps on the device therefore leaving it accessible to any other application on the device. It is protected by a permission which is not defined in the analysed application. As a result, the protection level of the permission should be checked where it is defined. If it is set to normal or dangerous, a malicious application can request and obtain the permission and interact with the component. If it is set to signature, only applications signed with the same certificate can obtain the permission. |
| 17 | Broadcast Receiver (com.google.android.apps.photos.dbprocessor.impl.DatabaseProcessorReceiver) is not Protected. [android:exported=true] | warning | A Broadcast Receiver is found to be shared with other apps on the device therefore leaving it accessible to any other application on the device. |
| 18 | Content Provider (com.google.android.apps.photos.devicemanagement.contentprovider.FreeUpSpaceContentProvider) is not Protected. [android:exported=true] | warning | A Content Provider is found to be shared with other apps on the device therefore leaving it accessible to any other application on the device. |
| 19 | Service (com.google.android.apps.photos.devicemanagement.overdrive.DeletionService) is not Protected. [android:exported=true] | warning | A Service is found to be shared with other apps on the device therefore leaving it accessible to any other application on the device. |
| 20 | Broadcast Receiver (com.google.android.apps.photos.devicemanagement.service.DeviceManagementReceiver) is not Protected. [android:exported=true] | warning | A Broadcast Receiver is found to be shared with other apps on the device therefore leaving it accessible to any other application on the device. |

| NO | ISSUE | SEVERITY | DESCRIPTION |
|----|--|----------|--|
| 21 | Broadcast Receiver (com.google.android.apps.photos.diskcache.cacheresize.CacheResizeReceiver) is not Protected. [android:exported=true] | warning | A Broadcast Receiver is found to be shared with other apps on the device therefore leaving it accessible to any other application on the device. |
| 22 | Activity (com.google.android.apps.photos.editor.intents.EditActivity) is not Protected. [android:exported=true] | warning | An Activity is found to be shared with other apps on the device therefore leaving it accessible to any other application on the device. |
| 23 | Activity-Alias (com.google.android.apps.photos.editor.intents.EditVideoActivity) is not Protected. [android:exported=true] | warning | An Activity-Alias is found to be shared with other apps on the device therefore leaving it accessible to any other application on the device. |
| 24 | Activity (com.google.android.apps.photos.envelope.AlbumActivity) is not Protected. [android:exported=true] | warning | An Activity is found to be shared with other apps on the device therefore leaving it accessible to any other application on the device. |
| 25 | Activity-Alias (com.google.android.apps.photos.envelope.pullbasedsharing.deeplink.PullBasedSharingDeepLinkActivityAlias) is not Protected. [android:exported=true] | warning | An Activity-Alias is found to be shared with other apps on the device therefore leaving it accessible to any other application on the device. |
| 26 | Broadcast Receiver (com.google.android.apps.photos.experiments.phenotype.full.PhenotypeUpdateBroadcastReceiver) is not Protected. [android:exported=true] | warning | A Broadcast Receiver is found to be shared with other apps on the device therefore leaving it accessible to any other application on the device. |
| 27 | Activity (com.google.android.apps.photos.home.entrypoint.deeplink.HomeDeepLinkActivity) is not Protected. [android:exported=true] | warning | An Activity is found to be shared with other apps on the device therefore leaving it accessible to any other application on the device. |
| 28 | Activity-Alias (com.google.android.apps.photos.home.HomeActivityAlias) is not Protected. [android:exported=true] | warning | An Activity-Alias is found to be shared with other apps on the device therefore leaving it accessible to any other application on the device. |
| 29 | Broadcast Receiver (com.google.android.apps.photos.jobqueue.JobServiceBroadcastReceiver) is not Protected. [android:exported=true] | warning | A Broadcast Receiver is found to be shared with other apps on the device therefore leaving it accessible to any other application on the device. |
| 30 | Broadcast Receiver (com.google.android.apps.photos.localization.LocaleChangedReceiver) is not Protected. [android:exported=true] | warning | A Broadcast Receiver is found to be shared with other apps on the device therefore leaving it accessible to any other application on the device. |
| 31 | Content Provider (com.google.android.apps.photos.mars.contentprovider.impl.MarsStoreProvider) is not Protected. [android:exported=true] | warning | A Content Provider is found to be shared with other apps on the device therefore leaving it accessible to any other application on the device. |
| 32 | Activity (com.google.android.apps.photos.mars.review.impl.MarsGatewayActivity) is not Protected. [android:exported=true] | warning | An Activity is found to be shared with other apps on the device therefore leaving it accessible to any other application on the device. |

| NO | ISSUE | SEVERITY | DESCRIPTION |
|----|---|----------|--|
| 33 | TaskAffinity is set for activity (com.google.android.apps.photos.memories.notifications.MemoriesNotificationTrampolineActivity) | warning | If taskAffinity is set, then other application could read the Intents sent to Activities belonging to another task. Always use the default setting keeping the affinity as the package name in order to prevent sensitive information inside sent or received Intents from being read by another application. |
| 34 | Broadcast Receiver (com.google.android.apps.photos.metasync.periodic.PackageUpdatedReceiver) is not Protected. [android:exported=true] | warning | A Broadcast Receiver is found to be shared with other apps on the device therefore leaving it accessible to any other application on the device. |
| 35 | Activity (com.google.android.apps.photos.pager.HostPhotoPagerActivity) is not Protected. [android:exported=true] | warning | An Activity is found to be shared with other apps on the device therefore leaving it accessible to any other application on the device. |
| 36 | Activity-Alias (com.google.android.apps.photos.partneraccount.receive.deeplink.PartnerSharingInvitationGatewayActivityAlias) is not Protected. [android:exported=true] | warning | An Activity-Alias is found to be shared with other apps on the device therefore leaving it accessible to any other application on the device. |
| 37 | Content Provider (com.google.android.apps.photos.partnercontentprovider.PartnerContentProvider) is not Protected. [android:exported=true] | warning | A Content Provider is found to be shared with other apps on the device therefore leaving it accessible to any other application on the device. |
| 38 | TaskAffinity is set for activity (com.google.android.apps.photos.permissions.accessmedialocation.AccessMediaLocationPermissionsCheckActivity) | warning | If taskAffinity is set, then other application could read the Intents sent to Activities belonging to another task. Always use the default setting keeping the affinity as the package name in order to prevent sensitive information inside sent or received Intents from being read by another application. |
| 39 | Activity-Alias (com.google.android.apps.photos.photoframes.devices.deeplink.PhotoFrameDeviceDeepLinkActivityAlias) is not Protected. [android:exported=true] | warning | An Activity-Alias is found to be shared with other apps on the device therefore leaving it accessible to any other application on the device. |
| 40 | Content Provider (com.google.android.apps.photos.photoprovider.PhotoProvider) is Protected by a permission, but the protection level of the permission should be checked. Permission: android.permission.MANAGE_DOCUMENTS [android:exported=true] | warning | A Content Provider is found to be shared with other apps on the device therefore leaving it accessible to any other application on the device. It is protected by a permission which is not defined in the analysed application. As a result, the protection level of the permission should be checked where it is defined. If it is set to normal or dangerous, a malicious application can request and obtain the permission and interact with the component. If it is set to signature, only applications signed with the same certificate can obtain the permission. |
| 41 | Activity (com.google.android.apps.photos.picker.external.ExternalPickerActivity) is not Protected. [android:exported=true] | warning | An Activity is found to be shared with other apps on the device therefore leaving it accessible to any other application on the device. |

| NO | ISSUE | SEVERITY | DESCRIPTION |
|----|---|----------|--|
| 42 | Broadcast Receiver (com.google.android.apps.photos.pixel.offer.full.PixelOfferReceiver) is not Protected. [android:exported=true] | warning | A Broadcast Receiver is found to be shared with other apps on the device therefore leaving it accessible to any other application on the device. |
| 43 | Activity-Alias (com.google.android.apps.photos.printingskus.deeplinks.PrintingDeepLinkGatewayActivityAlias) is not Protected. [android:exported=true] | warning | An Activity-Alias is found to be shared with other apps on the device therefore leaving it accessible to any other application on the device. |
| 44 | Service (com.google.android.apps.photos.restore.apiservice.PhotosRestoreApiService) is not Protected. [android:exported=true] | warning | A Service is found to be shared with other apps on the device therefore leaving it accessible to any other application on the device. |
| 45 | Broadcast Receiver (com.google.android.apps.photos.restore.service.RestoreRestartReceiver) is not Protected. [android:exported=true] | warning | A Broadcast Receiver is found to be shared with other apps on the device therefore leaving it accessible to any other application on the device. |
| 46 | Broadcast Receiver (com.google.android.apps.photos.scheduler.LpbjWorkSchedulerOnBroadcast) is not Protected. [android:exported=true] | warning | A Broadcast Receiver is found to be shared with other apps on the device therefore leaving it accessible to any other application on the device. |
| 47 | Broadcast Receiver (com.google.android.apps.photos.sdcard.envcache.ExternalStorageStateChangeBroadcastReceiver) is not Protected. [android:exported=true] | warning | A Broadcast Receiver is found to be shared with other apps on the device therefore leaving it accessible to any other application on the device. |
| 48 | Activity (com.google.android.apps.photos.search.guidedperson.GuidedPersonConfirmationActivity) is not Protected. [android:exported=true] | | An Activity is found to be shared with other apps on the device therefore leaving it accessible to any other application on the device. |
| 49 | Activity (com.google.android.apps.photos.search.guidedthings.GuidedThingsConfirmationActivity) is not Protected. [android:exported=true] | warning | An Activity is found to be shared with other apps on the device therefore leaving it accessible to any other application on the device. |

SHARED LIBRARY BINARY ANALYSIS

| NO | SHARED OBJECT | NX | STACK CANARY | RELRO | RPATH | RUNPATH | FORTIFY | SYMBOLS STRIPPED | |
|----|---------------|----|--------------|-------|-------|---------|---------|---------------------|--|
|----|---------------|----|--------------|-------|-------|---------|---------|---------------------|--|

| NO | SHARED OBJECT | NX | STACK CANARY | RELRO | RPATH | RUNPATH | FORTIFY | SYMBOLS STRIPPED |
|----|-------------------------------------|---|---|--|---|---|---|---|
| 1 | arm64-v8a/libflacJNl.so | True info The binary has NX bit set. This marks a memory page non- executable making attacker injected shellcode non- executable. | True info This binary has a stack canary value added to the stack so that it will be overwritten by a stack buffer that overflows the return address. This allows detection of overflows by verifying the integrity of the canary before function return. | Full RELRO info This shared object has full RELRO enabled. RELRO ensures that the GOT cannot be overwritten in vulnerable ELF binaries. In Full RELRO, the entire GOT (.got and .got.plt both) is marked as read-only. | None info The binary does not have run-time search path or RPATH set. | None info The binary does not have RUNPATH set. | False warning The binary does not have any fortified functions. Fortified functions provides buffer overflow checks against glibc's commons insecure functions like strcpy, gets etc. Use the compiler option - D_FORTIFY_SOURCE=2 to fortify functions. This check is not applicable for Dart/Flutter libraries. | False warning Symbols are available. |
| 2 | arm64-v8a/libfilterframework_jni.so | True info The binary has NX bit set. This marks a memory page non- executable making attacker injected shellcode non- executable. | False high This binary does not have a stack canary value added to the stack. Stack canaries are used to detect and prevent exploits from overwriting return address. Use the option -fstack-protector-all to enable stack canaries. Not applicable for Dart/Flutter libraries unless Dart FFI is used. | Full RELRO info This shared object has full RELRO enabled. RELRO ensures that the GOT cannot be overwritten in vulnerable ELF binaries. In Full RELRO, the entire GOT (.got and .got.plt both) is marked as read-only. | None info The binary does not have run-time search path or RPATH set. | None info The binary does not have RUNPATH set. | False warning The binary does not have any fortified functions. Fortified functions provides buffer overflow checks against glibc's commons insecure functions like strcpy, gets etc. Use the compiler option - D_FORTIFY_SOURCE=2 to fortify functions. This check is not applicable for Dart/Flutter libraries. | False warning Symbols are available. |
| 3 | arm64-v8a/libnative.so | True info The binary has NX bit set. This marks a memory page non- executable making attacker injected shellcode non- executable. | True info This binary has a stack canary value added to the stack so that it will be overwritten by a stack buffer that overflows the return address. This allows detection of overflows by verifying the integrity of the canary before function return. | Full RELRO info This shared object has full RELRO enabled. RELRO ensures that the GOT cannot be overwritten in vulnerable ELF binaries. In Full RELRO, the entire GOT (.got and .got.plt both) is marked as read-only. | None info The binary does not have run-time search path or RPATH set. | None info The binary does not have RUNPATH set. | True info The binary has the following fortified functions: ['FD_SET_chk', 'strlen_chk', 'vsnprintf_chk', 'read_chk', 'memmove_chk'] | False warning Symbols are available. |

| NO | SHARED OBJECT | NX | STACK CANARY | RELRO | RPATH | RUNPATH | FORTIFY | SYMBOLS STRIPPED |
|----|--|---|---|--|---|---|---|--------------------------------------|
| 4 | arm64-v8a/libframesequence.so | True info The binary has NX bit set. This marks a memory page non- executable making attacker injected shellcode non- executable. | True info This binary has a stack canary value added to the stack so that it will be overwritten by a stack buffer that overflows the return address. This allows detection of overflows by verifying the integrity of the canary before function return. | Full RELRO info This shared object has full RELRO enabled. RELRO ensures that the GOT cannot be overwritten in vulnerable ELF binaries. In Full RELRO, the entire GOT (.got and .got.plt both) is marked as read-only. | None info The binary does not have run-time search path or RPATH set. | None info The binary does not have RUNPATH set. | False warning The binary does not have any fortified functions. Fortified functions provides buffer overflow checks against glibc's commons insecure functions like strcpy, gets etc. Use the compiler option - D_FORTIFY_SOURCE=2 to fortify functions. This check is not applicable for Dart/Flutter libraries. | False warning Symbols are available. |
| 5 | arm64-v8a/libwebp_android.so | True info The binary has NX bit set. This marks a memory page non- executable making attacker injected shellcode non- executable. | True info This binary has a stack canary value added to the stack so that it will be overwritten by a stack buffer that overflows the return address. This allows detection of overflows by verifying the integrity of the canary before function return. | Full RELRO info This shared object has full RELRO enabled. This allows detection of overflows by verifying the integrity of the canary before function return. | Full RELRO info This shared object has full RELRO enabled. RELRO ensures that the GOT cannot be overwritten in vulnerable ELF binaries. In Full RELRO, the entire GOT (.got and .got.plt both) is marked as read-only. | None info The binary does not have run-time search path or RPATH set. | None info The binary does not have RUNPATH set. | True info The binary has the following fortified functions: ['FD_SET_chk', 'strlen_chk', 'vsnprintf_chk', 'read_chk', 'memmove_chk'] | False warning Symbols are available. |

| NO | SHARED OBJECT | NX | STACK CANARY | RELRO | RPATH | RUNPATH | FORTIFY | SYMBOLS STRIPPED |
|----|--|---|---|--|---|---|---|--------------------------------------|
| 13 | arm64-v8a/libframesequence.so | True info The binary has NX bit set. This marks a memory page non- executable making attacker injected shellcode non- executable. | True info This binary has a stack canary value added to the stack so that it will be overwritten by a stack buffer that overflows the return address. This allows detection of overflows by verifying the integrity of the canary before function return. | Full RELRO info This shared object has full RELRO enabled. RELRO ensures that the GOT cannot be overwritten in vulnerable ELF binaries. In Full RELRO, the entire GOT (.got and .got.plt both) is marked as read-only. | None info The binary does not have run-time search path or RPATH set. | None info The binary does not have RUNPATH set. | False warning The binary does not have any fortified functions. Fortified functions provides buffer overflow checks against glibc's commons insecure functions like strcpy, gets etc. Use the compiler option - D_FORTIFY_SOURCE=2 to fortify functions. This check is not applicable for Dart/Flutter libraries. | False warning Symbols are available. |
| 14 | arm64-v8a/libwebp_android.so | True info The binary has NX bit set. This marks a memory page non-executable making attacker injected shellcode non-executable. | True info This binary has a stack canary value added to the stack so that it will be overwritten by a stack buffer that overflows the return address. This allows detection of overflows by verifying the integrity of the canary before function return. | Full RELRO info This shared object has full RELRO enabled. RELRO ensures that the GOT cannot be overwritten in vulnerable ELF binaries. In Full RELRO, the entire GOT (.got and .got.plt both) is marked as read-only. | None info The binary does not have run-time search path or RPATH set. | None info The binary does not have RUNPATH set. | False warning The binary does not have any fortified functions. Fortified functions provides buffer overflow checks against glibc's commons insecure functions like strcpy, gets etc. Use the compiler option - D_FORTIFY_SOURCE=2 to fortify functions. This check is not applicable for Dart/Flutter libraries. | False warning Symbols are available. |
| 15 | arm64-v8a/libphotos_release- nextsdk_alldpi_bytecode.so | True info The binary has NX bit set. This marks a memory page non- executable making attacker injected shellcode non- executable. | True info This binary has a stack canary value added to the stack so that it will be overwritten by a stack buffer that overflows the return address. This allows detection of overflows by verifying the integrity of the canary before function return. | Full RELRO info This shared object has full RELRO enabled. RELRO ensures that the GOT cannot be overwritten in vulnerable ELF binaries. In Full RELRO, the entire GOT (.got and .got.plt both) is marked as read-only. | None info The binary does not have run-time search path or RPATH set. | None info The binary does not have RUNPATH set. | False warning The binary does not have any fortified functions. Fortified functions provides buffer overflow checks against glibc's commons insecure functions like strcpy, gets etc. Use the compiler option - D_FORTIFY_SOURCE=2 to fortify functions. This check is not applicable for Dart/Flutter libraries. | False warning Symbols are available. |

| NO | SHARED OBJECT | NX | STACK CANARY | RELRO | RPATH | RUNPATH | FORTIFY | SYMBOLS STRIPPED |
|----|--|---|---|--|---|---|---|---|
| 16 | arm64-v8a/liboliveoil.so | True info The binary has NX bit set. This marks a memory page non- executable making attacker injected shellcode non- executable. | True info This binary has a stack canary value added to the stack so that it will be overwritten by a stack buffer that overflows the return address. This allows detection of overflows by verifying the integrity of the canary before function return. | Full RELRO info This shared object has full RELRO enabled. RELRO ensures that the GOT cannot be overwritten in vulnerable ELF binaries. In Full RELRO, the entire GOT (.got and .got.plt both) is marked as read-only. | None info The binary does not have run-time search path or RPATH set. | None info The binary does not have RUNPATH set. | False warning The binary does not have any fortified functions. Fortified functions provides buffer overflow checks against glibc's commons insecure functions like strcpy, gets etc. Use the compiler option - D_FORTIFY_SOURCE=2 to fortify functions. This check is not applicable for Dart/Flutter libraries. | False warning Symbols are available. |
| 17 | arm64- v8a/libnative_crash_handler_jni.so | True info The binary has NX bit set. This marks a memory page non- executable making attacker injected shellcode non- executable. | False high This binary does not have a stack canary value added to the stack. Stack canaries are used to detect and prevent exploits from overwriting return address. Use the option -fstack-protector-all to enable stack canaries. Not applicable for Dart/Flutter libraries unless Dart FFI is used. | Full RELRO info This shared object has full RELRO enabled. RELRO ensures that the GOT cannot be overwritten in vulnerable ELF binaries. In Full RELRO, the entire GOT (.got and .got.plt both) is marked as read-only. | None info The binary does not have run-time search path or RPATH set. | None info The binary does not have RUNPATH set. | False warning The binary does not have any fortified functions. Fortified functions provides buffer overflow checks against glibc's commons insecure functions like strcpy, gets etc. Use the compiler option - D_FORTIFY_SOURCE=2 to fortify functions. This check is not applicable for Dart/Flutter libraries. | False warning Symbols are available. |
| 18 | arm64-v8a/libcronet.93.0.4542.0.so | True info The binary has NX bit set. This marks a memory page non- executable making attacker injected shellcode non- executable. | True info This binary has a stack canary value added to the stack so that it will be overwritten by a stack buffer that overflows the return address. This allows detection of overflows by verifying the integrity of the canary before function return. | Full RELRO info This shared object has full RELRO enabled. RELRO ensures that the GOT cannot be overwritten in vulnerable ELF binaries. In Full RELRO, the entire GOT (.got and .got.plt both) is marked as read-only. | None info The binary does not have run-time search path or RPATH set. | None info The binary does not have RUNPATH set. | True info The binary has the following fortified functions: ['read_chk', 'vsnprintf_chk', 'memcpy_chk', 'FD_SET_chk', 'FD_CLR_chk', 'FD_ISSET_chk'] | False warning Symbols are available. |

■ NIAP ANALYSIS v1.3

| NO IDENTIFIER REQUIREMENT | FEATURE | DESCRIPTION |
|---------------------------|---------|-------------|
|---------------------------|---------|-------------|

**** *: ABUSED PERMISSIONS**

| TYPE | MATCHES | PERMISSIONS |
|--------------------------------|---------|---|
| Malware Permissions | 14/24 | android.permission.ACCESS_FINE_LOCATION, android.permission.ACCESS_COARSE_LOCATION, android.permission.READ_CONTACTS, android.permission.READ_PHONE_STATE, android.permission.GET_ACCOUNTS, android.permission.INTERNET, android.permission.VIBRATE, android.permission.WRITE_EXTERNAL_STORAGE, android.permission.SET_WALLPAPER, android.permission.SYSTEM_ALERT_WINDOW, android.permission.WAKE_LOCK, android.permission.ACCESS_NETWORK_STATE, android.permission.RECEIVE_BOOT_COMPLETED, android.permission.WRITE_SETTINGS |
| Other Common Permissions | 7/45 | android.permission.FOREGROUND_SERVICE, com.google.android.c2dm.permission.RECEIVE, android.permission.BLUETOOTH, android.permission.CHANGE_WIFI_STATE, android.permission.REQUEST_IGNORE_BATTERY_OPTIMIZATIONS, com.android.launcher.permission.INSTALL_SHORTCUT |

Malware Permissions:

Top permissions that are widely abused by known malware.

Other Common Permissions:

Permissions that are commonly abused by known malware.

Title: Google Photos

Score: 4.468153 Installs: 5.000.000.000+ Price: 0 Android Version Support: Category: Photography Play Store URL: com.google.android.apps.photos

Developer Details: Google LLC, 5700313618786177705, 1600 Amphitheatre Parkway, Mountain View 94043, https://support.google.com/photos, apps-help@google.com,

Release Date: May 28, 2015 Privacy Policy: Privacy link

Description:

Google Photos is the home for all your photos and videos, automatically organized and easy to share. - "The best photo product on Earth" - The Verge - "Google Photos is your new essential picture app" - Wired The official Google Photos app is made for the way you take photos today and includes essential features like shared albums, automatic creations and an advanced editing suite. Additionally every Google Account comes with 15 GB of storage and you can choose to automatically back up all your photos and videos in High quality or Original quality. You can then access them from any connected device and on photos.google.com. With the official app, you get: 15 GB OF STORAGE: Back up 15 GB of photos and videos and access them from any device and photos.google.com—your photos are safe, secure, and private to you. All photos and videos you back up in high quality before June 1, 2021 will not count toward your Google Account storage. FREE UP SPACE: Never worry about running out of space on your phone again. Photos that are safely backed up can be removed from your device's storage in just a tap. NO ADS: Google Photos doesn't sell your photos, videos, or personal information to anyone and we don't use your photos and videos for advertising. FAST AND POWERFUL SEARCH: Your photos are now searchable by the people, places and things in them — no tagging required. GOOGLE LENS: Search the hard-to-describe and get stuff done, right from a photo. Copy and translate text, identify plants and animals, add events to your calendar, find products online, and more. ADVANCED EDITING SUITE: Transform photos with a tap. Use intuitive and powerful photo editing tools to apply content-aware filters, adjust lighting, and more. AUTOMATIC CREATIONS: Bring photos to life with automatically created movies, collages, animations, panoramas, and more from your photos. Or easily create them yourself. SHARING SUGGESTIONS: With smart sharing suggestions, giving your friends the photos you took of them is painless. And they can add their photos, too, so you'll finally get the photos you're actually in. LIVE ALBUMS: Select the people and pets you want to see and Google Photos will automatically add photos of them as you take them, no manual updates needed.* PHOTO BOOKS: Create a photo book in just minutes from your phone or computer. You can also see suggested photo books based on your best shots from a trip or period of time.* SEND PHOTOS IN SECONDS: Instantly share photos with any contact, email, or phone number. SHARED LIBRARIES: Grant a trusted person access to all of your photos. You can also upgrade storage for your Google Account, used for Original Quality photos and videos by subscribing to Google One. Subscriptions start at \$1.99/month for 100 GB in the US. Pricing and availability can vary by region. - Google One Terms of Service: https://one.google.com/terms-of-service - One Google Pricing: https://one.google.com/about For additional help visit https://support.google.com/photos Google Photos is also available on Wear OS for the Google Pixel Watch. Set your favorite photos as your watch face. *Face grouping, live albums and photo books are not available in all countries.
