∷ APPLICATION PERMISSIONS

PERMISSION	STATUS	INFO	DESCRIPTION
android.permission.ACCESS_FINE_LOCATION	dangerous	fine (GPS) location	Access fine location sources, such as the Global Positioning System on the phone, where available. Malicious applications can use this to determine where you are and may consume additional battery power.
android.permission.ACCESS_COARSE_LOCATION	dangerous	coarse (network-based) location	Access coarse location sources, such as the mobile network database, to determine an approximate phone location, where available. Malicious applications can use this to determine approximately where you are.
android.permission.READ_CONTACTS	dangerous	read contact data	Allows an application to read all of the contact (address) data stored on your phone. Malicious applications can use this to send your data to other people.
android.permission.READ_PROFILE	dangerous	read the user's personal profile data	Allows an application to read the user's personal profile data.
android.permission.READ_PHONE_STATE	dangerous	read phone state and identity	Allows the application to access the phone features of the device. An application with this permission can determine the phone number and serial number of this phone, whether a call is active, the number that call is connected to and so on.
android.permission.SUBSCRIBED_FEEDS_READ	normal	read subscribed feeds	Allows an application to receive details about the currently synced feeds.
android.permission.SUBSCRIBED_FEEDS_WRITE	dangerous	write subscribed feeds	Allows an application to modify your currently synced feeds. This could allow a malicious application to change your synced feeds.
android.permission.WRITE_SYNC_SETTINGS	normal	write sync settings	Allows an application to modify the sync settings, such as whether sync is enabled for Contacts.

PERMISSION	STATUS	INFO	DESCRIPTION
android.permission.READ_SYNC_SETTINGS	normal	read sync settings	Allows an application to read the sync settings, such as whether sync is enabled for Contacts.
android.permission.MANAGE_ACCOUNTS	dangerous	manage the accounts list	Allows an application to perform operations like adding and removing accounts and deleting their password.
android.permission.USE_CREDENTIALS	dangerous	use the authentication credentials of an account	Allows an application to request authentication tokens.
android.permission.DOWNLOAD_WITHOUT_NOTIFICATION	unknown	Unknown permission	Unknown permission from android reference
android.permission.GET_ACCOUNTS	dangerous	list accounts	Allows access to the list of accounts in the Accounts Service.
android.permission.FOREGROUND_SERVICE	normal	enables regular apps to use Service.startForeground.	Allows a regular application to use Service.startForeground.
com.google.android.c2dm.permission.RECEIVE	normal	recieve push notifications	Allows an application to receive push notifications from cloud.
android.permission.NFC	normal	control Near-Field Communication	Allows an application to communicate with Near-Field Communication (NFC) tags, cards and readers.
android.permission.INTERNET	normal	full Internet access	Allows an application to create network sockets.
android.permission.VIBRATE	normal	control vibrator	Allows the application to control the vibrator.
android.permission.GET_PACKAGE_SIZE	normal	measure application storage space	Allows an application to find out the space used by any package.
android.permission.BLUETOOTH	normal	create Bluetooth connections	Allows applications to connect to paired bluetooth devices.
android.permission.WRITE_EXTERNAL_STORAGE	dangerous	read/modify/delete external storage contents	Allows an application to write to external storage.
android.permission.SET_WALLPAPER	normal	set wallpaper	Allows the application to set the system wallpaper.
com.google.android.providers.gsf.permission.READ_GSERVICES	unknown	Unknown permission	Unknown permission from android reference
android.permission.SYSTEM_ALERT_WINDOW	dangerous	display system-level alerts	Allows an application to show system-alert windows. Malicious applications can take over the entire screen of the phone.
android.permission.WAKE_LOCK	normal	prevent phone from sleeping	Allows an application to prevent the phone from going to sleep.
android.permission.ACCESS_NETWORK_STATE	normal	view network status	Allows an application to view the status of all networks.

PERMISSION	STATUS	INFO	DESCRIPTION
android.permission.RECEIVE_BOOT_COMPLETED	normal	automatically start at boot	Allows an application to start itself as soon as the system has finished booting. This can make it take longer to start the phone and allow the application to slow down the overall phone by always running.
android.permission.CHANGE_WIFI_STATE	normal	change Wi-Fi status	Allows an application to connect to and disconnect from Wi-Fi access points and to make changes to configured Wi-Fi networks.
android.permission.CHANGE_NETWORK_STATE	normal	change network connectivity	Allows applications to change network connectivity state.
android.permission.WRITE_SETTINGS	dangerous	modify global system settings	Allows an application to modify the system's settings data. Malicious applications can corrupt your system's configuration.
com.android.vending.BILLING	normal	application has in-app purchases	Allows an application to make in-app purchases from Google Play.
android.permission.USE_BIOMETRIC	normal	allows use of device-supported biometric modalities.	Allows an app to use device supported biometric modalities.
android.permission.ACCESS_MEDIA_LOCATION	dangerous	access any geographic locations	Allows an application to access any geographic locations persisted in the user's shared collection.
android.permission.REQUEST_IGNORE_BATTERY_OPTIMIZATIONS	normal	permission for using Settings.ACTION_REQUEST_IGNORE_BATTERY_OPTIMIZATIONS.	Permission an application must hold in order to use Settings.ACTION_REQUEST_IGNORE_BATTERY_OPTIMIZATIONS.
android.permission.WRITE_MEDIA_STORAGE	unknown	Unknown permission	Unknown permission from android reference
com.android.launcher.permission.INSTALL_SHORTCUT	unknown	Unknown permission	Unknown permission from android reference

△ NETWORK SECURITY

Ī	NO	SCOPE	SEVERITY	DESCRIPTION

CERTIFICATE ANALYSIS

HIGH: 1 | WARNING: 1 | INFO: 1

TITLE	SEVERITY	DESCRIPTION
Signed Application	info	Application is signed with a code signing certificate
Application vulnerable to Janus Vulnerability	warning	Application is signed with v1 signature scheme, making it vulnerable to Janus vulnerability on Android 5.0-8.0, if signed only with v1 signature scheme. Applications running on Android 5.0-7.0 signed with v1, and v2/v3 scheme is also vulnerable.
Certificate algorithm vulnerable to hash collision	high	Application is signed with MD5. MD5 hash algorithm is known to have collision issues.

Q MANIFEST ANALYSIS

NO	ISSUE	SEVERITY	DESCRIPTION
1	App can be installed on a vulnerable upatched Android version Android 5.0-5.0.2, [minSdk=21]	high	This application can be installed on an older version of android that has multiple unfixed vulnerabilities. These devices won't receive reasonable security updates from Google. Support an Android version => 10, API 29 to receive reasonable security updates.
2	Clear text traffic is Enabled For App [android:usesCleartextTraffic=true]	high	The app intends to use cleartext network traffic, such as cleartext HTTP, FTP stacks, DownloadManager, and MediaPlayer. The default value for apps that target API level 27 or lower is "true". Apps that target API level 28 or higher default to "false". The key reason for avoiding cleartext traffic is the lack of confidentiality, authenticity, and protections against tampering; a network attacker can eavesdrop on transmitted data and also modify it without being detected.
3	Application Data can be Backed up [android:allowBackup=true]	warning	This flag allows anyone to backup your application data via adb. It allows users who have enabled USB debugging to copy application data off of the device.
4	Broadcast Receiver (com.google.android.apps.photos.account.full.RefreshAccountsReceiver) is not Protected. [android:exported=true]	warning	A Broadcast Receiver is found to be shared with other apps on the device therefore leaving it accessible to any other application on the device.
5	Broadcast Receiver (com.google.android.apps.photos.actionqueue.impl.SystemReceiver) is not Protected. [android:exported=true]	warning	A Broadcast Receiver is found to be shared with other apps on the device therefore leaving it accessible to any other application on the device.
6	Broadcast Receiver (com.google.android.apps.photos.analytics.install.InstallReceiver) is not Protected. [android:exported=true]	warning	A Broadcast Receiver is found to be shared with other apps on the device therefore leaving it accessible to any other application on the device.
7	Activity-Alias (com.google.android.apps.photos.autoadd.api.LiveAlbumCreationActivityAlias) is not Protected. [android:exported=true]	warning	An Activity-Alias is found to be shared with other apps on the device therefore leaving it accessible to any other application on the device.
8	Activity (com.google.android.apps.photos.autobackup.datatransparency.DataTransparencyActivity) is not Protected. [android:exported=true]	warning	An Activity is found to be shared with other apps on the device therefore leaving it accessible to any other application on the device.
9	Service (com.google.android.apps.photos.backup.apiservice.PhotosBackupApiService) is not Protected. [android:exported=true]	warning	A Service is found to be shared with other apps on the device therefore leaving it accessible to any other application on the device.
10	Service (com.google.android.apps.photos.backup.apiservice.PhotosCustomBackupApiService) is not Protected. [android:exported=true]	warning	A Service is found to be shared with other apps on the device therefore leaving it accessible to any other application on the device.

NO	ISSUE	SEVERITY	DESCRIPTION
11	Service (com.google.android.apps.photos.backup.apiservice.extensions.BackupExtensionsApiService) is not Protected. [android:exported=true]	warning	A Service is found to be shared with other apps on the device therefore leaving it accessible to any other application on the device.
12	Service (com.google.android.apps.photos.cameraassistant.CameraAssistantService) is not Protected. [android:exported=true]	warning	A Service is found to be shared with other apps on the device therefore leaving it accessible to any other application on the device.
13	Activity (com.google.android.apps.photos.cloudstorage.ui.backupoptions.BackupOptionsActivity) is not Protected. [android:exported=true]	warning	An Activity is found to be shared with other apps on the device therefore leaving it accessible to any other application on the device.
14	Activity (com.google.android.apps.photos.create.movie.deeplink.ConceptMovieDeepLinkActivity) is not Protected. [android:exported=true]	warning	An Activity is found to be shared with other apps on the device therefore leaving it accessible to any other application on the device.
15	Activity-Alias (com.google.android.apps.photos.create.movie.deeplink.ConceptMovieDeepLinkActivityAlias) is not Protected. [android:exported=true]	warning	An Activity-Alias is found to be shared with other apps on the device therefore leaving it accessible to any other application on the device.
16	Service (com.google.android.apps.photos.daydream.PhotosDreamService) is Protected by a permission, but the protection level of the permission should be checked. Permission: android.permission.BIND_DREAM_SERVICE [android:exported=true]	warning	A Service is found to be shared with other apps on the device therefore leaving it accessible to any other application on the device. It is protected by a permission which is not defined in the analysed application. As a result, the protection level of the permission should be checked where it is defined. If it is set to normal or dangerous, a malicious application can request and obtain the permission and interact with the component. If it is set to signature, only applications signed with the same certificate can obtain the permission.
17	Broadcast Receiver (com.google.android.apps.photos.dbprocessor.impl.DatabaseProcessorReceiver) is not Protected. [android:exported=true]	warning	A Broadcast Receiver is found to be shared with other apps on the device therefore leaving it accessible to any other application on the device.
18	Content Provider (com.google.android.apps.photos.devicemanagement.contentprovider.FreeUpSpaceContentProvider) is not Protected. [android:exported=true]	warning	A Content Provider is found to be shared with other apps on the device therefore leaving it accessible to any other application on the device.
19	Service (com.google.android.apps.photos.devicemanagement.overdrive.DeletionService) is not Protected. [android:exported=true]	warning	A Service is found to be shared with other apps on the device therefore leaving it accessible to any other application on the device.
20	Broadcast Receiver (com.google.android.apps.photos.devicemanagement.service.DeviceManagementReceiver) is not Protected. [android:exported=true]	warning	A Broadcast Receiver is found to be shared with other apps on the device therefore leaving it accessible to any other application on the device.

NO	ISSUE	SEVERITY	DESCRIPTION
21	Broadcast Receiver (com.google.android.apps.photos.diskcache.cacheresize.CacheResizeReceiver) is not Protected. [android:exported=true]	warning	A Broadcast Receiver is found to be shared with other apps on the device therefore leaving it accessible to any other application on the device.
22	Activity (com.google.android.apps.photos.editor.intents.EditActivity) is not Protected. [android:exported=true]	warning	An Activity is found to be shared with other apps on the device therefore leaving it accessible to any other application on the device.
23	Activity-Alias (com.google.android.apps.photos.editor.intents.EditVideoActivity) is not Protected. [android:exported=true]	warning	An Activity-Alias is found to be shared with other apps on the device therefore leaving it accessible to any other application on the device.
24	Activity (com.google.android.apps.photos.envelope.AlbumActivity) is not Protected. [android:exported=true]	warning	An Activity is found to be shared with other apps on the device therefore leaving it accessible to any other application on the device.
25	Activity-Alias (com.google.android.apps.photos.envelope.pullbasedsharing.deeplink.PullBasedSharingDeepLinkActivityAlias) is not Protected. [android:exported=true]	warning	An Activity-Alias is found to be shared with other apps on the device therefore leaving it accessible to any other application on the device.
26	Broadcast Receiver (com.google.android.apps.photos.experiments.phenotype.full.PhenotypeUpdateBroadcastReceiver) is not Protected. [android:exported=true]	warning	A Broadcast Receiver is found to be shared with other apps on the device therefore leaving it accessible to any other application on the device.
27	Activity (com.google.android.apps.photos.home.entrypoint.deeplink.HomeDeepLinkActivity) is not Protected. [android:exported=true]	warning	An Activity is found to be shared with other apps on the device therefore leaving it accessible to any other application on the device.
28	Activity-Alias (com.google.android.apps.photos.home.HomeActivityAlias) is not Protected. [android:exported=true]	warning	An Activity-Alias is found to be shared with other apps on the device therefore leaving it accessible to any other application on the device.
29	Broadcast Receiver (com.google.android.apps.photos.jobqueue.JobServiceBroadcastReceiver) is not Protected. [android:exported=true]	warning	A Broadcast Receiver is found to be shared with other apps on the device therefore leaving it accessible to any other application on the device.
30	Broadcast Receiver (com.google.android.apps.photos.localization.LocaleChangedReceiver) is not Protected. [android:exported=true]	warning	A Broadcast Receiver is found to be shared with other apps on the device therefore leaving it accessible to any other application on the device.
31	Content Provider (com.google.android.apps.photos.mars.contentprovider.impl.MarsStoreProvider) is not Protected. [android:exported=true]	warning	A Content Provider is found to be shared with other apps on the device therefore leaving it accessible to any other application on the device.
32	Activity (com.google.android.apps.photos.mars.review.impl.MarsGatewayActivity) is not Protected. [android:exported=true]	warning	An Activity is found to be shared with other apps on the device therefore leaving it accessible to any other application on the device.

NO	ISSUE	SEVERITY	DESCRIPTION
33	TaskAffinity is set for activity (com.google.android.apps.photos.memories.notifications.MemoriesNotificationTrampolineActivity)	warning	If taskAffinity is set, then other application could read the Intents sent to Activities belonging to another task. Always use the default setting keeping the affinity as the package name in order to prevent sensitive information inside sent or received Intents from being read by another application.
34	Broadcast Receiver (com.google.android.apps.photos.metasync.periodic.PackageUpdatedReceiver) is not Protected. [android:exported=true]	warning	A Broadcast Receiver is found to be shared with other apps on the device therefore leaving it accessible to any other application on the device.
35	Activity (com.google.android.apps.photos.pager.HostPhotoPagerActivity) is not Protected. [android:exported=true]	warning	An Activity is found to be shared with other apps on the device therefore leaving it accessible to any other application on the device.
36	Activity-Alias (com.google.android.apps.photos.partneraccount.receive.deeplink.PartnerSharingInvitationGatewayActivityAlias) is not Protected. [android:exported=true]	warning	An Activity-Alias is found to be shared with other apps on the device therefore leaving it accessible to any other application on the device.
37	Content Provider (com.google.android.apps.photos.partnercontentprovider.PartnerContentProvider) is not Protected. [android:exported=true]	warning	A Content Provider is found to be shared with other apps on the device therefore leaving it accessible to any other application on the device.
38	TaskAffinity is set for activity (com.google.android.apps.photos.permissions.accessmedialocation.AccessMediaLocationPermissionsCheckActivity)	warning	If taskAffinity is set, then other application could read the Intents sent to Activities belonging to another task. Always use the default setting keeping the affinity as the package name in order to prevent sensitive information inside sent or received Intents from being read by another application.
39	Activity-Alias (com.google.android.apps.photos.photoframes.devices.deeplink.PhotoFrameDeviceDeepLinkActivityAlias) is not Protected. [android:exported=true]	warning	An Activity-Alias is found to be shared with other apps on the device therefore leaving it accessible to any other application on the device.
40	Content Provider (com.google.android.apps.photos.photoprovider.PhotoProvider) is Protected by a permission, but the protection level of the permission should be checked. Permission: android.permission.MANAGE_DOCUMENTS [android:exported=true]	warning	A Content Provider is found to be shared with other apps on the device therefore leaving it accessible to any other application on the device. It is protected by a permission which is not defined in the analysed application. As a result, the protection level of the permission should be checked where it is defined. If it is set to normal or dangerous, a malicious application can request and obtain the permission and interact with the component. If it is set to signature, only applications signed with the same certificate can obtain the permission.
41	Activity (com.google.android.apps.photos.picker.external.ExternalPickerActivity) is not Protected. [android:exported=true]	warning	An Activity is found to be shared with other apps on the device therefore leaving it accessible to any other application on the device.

NO	ISSUE	SEVERITY	DESCRIPTION
42	Broadcast Receiver (com.google.android.apps.photos.pixel.offer.full.PixelOfferReceiver) is not Protected. [android:exported=true]	warning	A Broadcast Receiver is found to be shared with other apps on the device therefore leaving it accessible to any other application on the device.
43	Activity-Alias (com.google.android.apps.photos.printingskus.deeplinks.PrintingDeepLinkGatewayActivityAlias) is not Protected. [android:exported=true]	warning	An Activity-Alias is found to be shared with other apps on the device therefore leaving it accessible to any other application on the device.
44	Service (com.google.android.apps.photos.restore.apiservice.PhotosRestoreApiService) is not Protected. [android:exported=true]	warning	A Service is found to be shared with other apps on the device therefore leaving it accessible to any other application on the device.
45	Broadcast Receiver (com.google.android.apps.photos.restore.service.RestoreRestartReceiver) is not Protected. [android:exported=true]	warning	A Broadcast Receiver is found to be shared with other apps on the device therefore leaving it accessible to any other application on the device.
46	Broadcast Receiver (com.google.android.apps.photos.scheduler.LpbjWorkSchedulerOnBroadcast) is not Protected. [android:exported=true]	warning	A Broadcast Receiver is found to be shared with other apps on the device therefore leaving it accessible to any other application on the device.
47	Broadcast Receiver (com.google.android.apps.photos.sdcard.envcache.ExternalStorageStateChangeBroadcastReceiver) is not Protected. [android:exported=true]	warning	A Broadcast Receiver is found to be shared with other apps on the device therefore leaving it accessible to any other application on the device.
48	Activity (com.google.android.apps.photos.search.guidedperson.GuidedPersonConfirmationActivity) is not Protected. [android:exported=true]	warning	An Activity is found to be shared with other apps on the device therefore leaving it accessible to any other application on the device.
49	Activity (com.google.android.apps.photos.search.guidedthings.GuidedThingsConfirmationActivity) is not Protected. [android:exported=true]	warning	An Activity is found to be shared with other apps on the device therefore leaving it accessible to any other application on the device.
50	Activity (com.google.android.apps.photos.search.SearchActivity) is not Protected. [android:exported=true]	warning	An Activity is found to be shared with other apps on the device therefore leaving it accessible to any other application on the device.
51	Activity-Alias (com.google.android.apps.photos.search.SearchActivityAlias) is not Protected. [android:exported=true]	warning	An Activity-Alias is found to be shared with other apps on the device therefore leaving it accessible to any other application on the device.
52	Activity (com.google.android.apps.photos.setwallpaper.SetWallpaperActivity) is not Protected. [android:exported=true]	warning	An Activity is found to be shared with other apps on the device therefore leaving it accessible to any other application on the device.
53	Activity (com.google.android.apps.photos.uploadtoalbum.UploadContentActivity) is not Protected. [android:exported=true]	warning	An Activity is found to be shared with other apps on the device therefore leaving it accessible to any other application on the device.

NO	ISSUE	SEVERITY	DESCRIPTION
54	Activity (com.google.android.apps.photos.videoeditor.partner.PartnerVideoStabilizeEditActivity) is not Protected. [android:exported=true]	warning	An Activity is found to be shared with other apps on the device therefore leaving it accessible to any other application on the device.
55	Activity (com.google.android.apps.photos.vrviewer.v2.cardboard.CardboardActivity) is not Protected. [android:exported=true]	warning	An Activity is found to be shared with other apps on the device therefore leaving it accessible to any other application on the device.
56	Activity (com.google.android.libraries.abuse.reporting.ReportAbuseActivity) is not Protected. [android:exported=true]	warning	An Activity is found to be shared with other apps on the device therefore leaving it accessible to any other application on the device.
57	Broadcast Receiver (com.google.android.libraries.notifications.entrypoints.accountchanged.AccountChangedReceiver) is not Protected. [android:exported=true]	warning	A Broadcast Receiver is found to be shared with other apps on the device therefore leaving it accessible to any other application on the device.
58	Broadcast Receiver (com.google.android.libraries.notifications.entrypoints.blockstatechanged.BlockStateChangedReceiver) is not Protected. NO	SHARED OBJECT	NX	STACK CANARY	RELRO	RPATH	RUNPATH	FORTIFY	SYMBOLS STRIPPED
1	arm64- v8a/libnative_crash_handler_jni.so	True info The binary has NX bit set. This marks a memory page non- executable making attacker injected shellcode non- executable.	False high This binary does not have a stack canary value added to the stack. Stack canaries are used to detect and prevent exploits from overwriting return address. Use the option -fstack-protector-all to enable stack canaries. Not applicable for Dart/Flutter libraries unless Dart FFI is used.	Full RELRO info This shared object has full RELRO enabled. RELRO ensures that the GOT cannot be overwritten in vulnerable ELF binaries. In Full RELRO, the entire GOT (.got and .got.plt both) is marked as read-only.	None info The binary does not have run-time search path or RPATH set.	None info The binary does not have RUNPATH set.	False warning The binary does not have any fortified functions. Fortified functions provides buffer overflow checks against glibc's commons insecure functions like strcpy, gets etc. Use the compiler option - D_FORTIFY_SOURCE=2 to fortify functions. This check is not applicable for Dart/Flutter libraries.	False warning Symbols are available.
2	arm64-v8a/liboliveoil.so	True info The binary has NX bit set. This marks a memory page non-executable making attacker injected shellcode non-executable.	True info This binary has a stack canary value added to the stack so that it will be overwritten by a stack buffer that overflows the return address. This allows detection of overflows by verifying the integrity of the canary before function return.	Full RELRO info This shared object has full RELRO enabled. RELRO ensures that the GOT cannot be overwritten in vulnerable ELF binaries. In Full RELRO, the entire GOT (.got and .got.plt both) is marked as read-only.	None info The binary does not have run-time search path or RPATH set.	None info The binary does not have RUNPATH set.	False warning The binary does not have any fortified functions. Fortified functions provides buffer overflow checks against glibc's commons insecure functions like strcpy, gets etc. Use the compiler option - D_FORTIFY_SOURCE=2 to fortify functions. This check is not applicable for Dart/Flutter libraries.	False warning Symbols are available.
3	arm64-v8a/libframesequence.so	True info The binary has NX bit set. This marks a memory page non- executable making attacker injected shellcode non- executable.	True info This binary has a stack canary value added to the stack so that it will be overwritten by a stack buffer that overflows the return address. This allows detection of overflows by verifying the integrity of the canary before function return.	Full RELRO info This shared object has full RELRO enabled. RELRO ensures that the GOT cannot be overwritten in vulnerable ELF binaries. In Full RELRO, the entire GOT (.got and .got.plt both) is marked as read-only.	None info The binary does not have run-time search path or RPATH set.	None info The binary does not have RUNPATH set.	False warning The binary does not have any fortified functions. Fortified functions provides buffer overflow checks against glibc's commons insecure functions like strcpy, gets etc. Use the compiler option - D_FORTIFY_SOURCE=2 to fortify functions. This check is not applicable for Dart/Flutter libraries.	False warning Symbols are available.

Title: Google Photos

Score: 4.4689145 Installs: 5,000,000,000+ Price: 0 Android Version Support: Category: Photography Play Store URL: com.google.android.apps.photos

Developer Details: Google LLC, 5700313618786177705, 1600 Amphitheatre Parkway, Mountain View 94043, https://support.google.com/photos, apps-help@google.com,

Release Date: May 28, 2015 Privacy Policy: Privacy link

Description:

Google Photos is the home for all your photos and videos, automatically organized and easy to share. - "The best photo product on Earth" - The Verge - "Google Photos is your new essential picture app" - Wired The official Google Photos app is made for the way you take photos today and includes essential features like shared albums, automatic creations and an advanced editing suite. Additionally every Google Account comes with 15 GB of storage and you can choose to automatically back up all your photos and videos in High quality or Original quality. You can then access them from any connected device and on photos.google.com. With the official app, you get: 15 GB OF STORAGE: Back up 15 GB of photos and videos and access them from any device and photos.google.com—your photos are safe, secure, and private to you. All photos and videos you back up in high quality before June 1, 2021 will not count toward your Google Account storage. FREE UP SPACE: Never worry about running out of space on your phone again. Photos that are safely backed up can be removed from your device's storage in just a tap. NO ADS: Google Photos doesn't sell your photos, videos, or personal information to anyone and we don't use your photos and videos for advertising. FAST AND POWERFUL SEARCH: Your photos are now searchable by the people, places and things in them — no tagging required. GOOGLE LENS: Search the hard-to-describe and get stuff done, right from a photo. Copy and translate text, identify plants and animals, add events to your calendar, find products online, and more. ADVANCED EDITING SUITE: Transform photos with a tap. Use intuitive and powerful photo editing tools to apply content-aware filters, adjust lighting, and more. AUTOMATIC CREATIONS: Bring photos to life with automatically created movies, collages, animations, panoramas, and more from your photos. Or easily create them yourself. SHARING SUGGESTIONS: With smart sharing suggestions, giving your friends the photos you took of them is painless. And they can add their photos, too, so you'll finally get the photos you're actually in. LIVE ALBUMS: Select the people and pets you want to see and Google Photos will automatically add photos of them as you take them, no manual updates needed.* PHOTO BOOKS: Create a photo book in just minutes from your phone or computer. You can also see suggested photo books based on your best shots from a trip or period of time.* SEND PHOTOS IN SECONDS: Instantly share photos with any contact, email, or phone number. SHARED LIBRARIES: Grant a trusted person access to all of your photos. You can also upgrade storage for your Google Account, used for Original Quality photos and videos by subscribing to Google One. Subscriptions start at \$1.99/month for 100 GB in the US. Pricing and availability can vary by region. - Google One Terms of Service: https://one.google.com/terms-of-service - One Google Pricing: https://one.google.com/about For additional help visit https://support.google.com/photos Google Photos is also available on Wear OS for the Google Pixel Watch. Set your favorite photos as your watch face. *Face grouping, live albums and photo books are not available in all countries.
